

CINCINNATI COMMERCIAL CONTRACTING METAL BUILDINGS

KUTOL

Corporate Offices

**100
PARTNERSHIP WAY**

A COST EFFECTIVE OPTION FOR YOUR BUSINESS

“We contracted CCC to build a 155,000 square foot corporate office, manufacturing and distribution facility. For us, this was a dream come true, to build a plant to our specifications to support our growth. I do not believe there is another contractor in this area that is as honest, open and straight forward as CCC.”

— Joe Rhodenbaugh
President of Kutol Product Company

FIND BETTER WAYS TO BUILD

A resourceful approach to even the smallest building component can equate to better workmanship and durability. CCC works with Butler Manufacturing Company, the nation’s oldest and largest manufacturer of pre-engineered metal building (PEMB) systems. Butler’s building systems are engineered to exact specifications for the best possible building performance.

The difference is in the details. Finding the right turnkey building solution for you is of the utmost importance. CCC and Butler together offer quality products, lower construction costs, and fast project completion. Both the interior and exterior of your space can be fully customized to provide your business with the design and functionality that it deserves. Let’s work together to determine if a Pre-Engineered Metal Building system may be the right option for you.

INDUSTRIES SERVED

CCC has extensive experience with metal building construction projects, including:

- Manufacturing & Industrial
- Office & Warehouse Distribution
- Indoor Sport Facilities
- Self-Storage
- Religious Buildings
- Building Additions
- Crane Buildings
- Education & Community Spaces
- Re-Roof & Retrofit
- Automotive Dealerships & Service Centers

Whether this is your first commercial construction project or you are well versed with the process, CCC wants a great experience for you. Your success is always the final target. Visit cccontracting.com to learn more about the process and commitment to clients.

CINCINNATI COMMERCIAL CONTRACTING METAL BUILDINGS

BUILDING, EXPANDING, RENOVATING METAL BUILDINGS OFFER FLEXIBLE SOLUTIONS

Whether you are designing a new building or planning a much needed addition, consider the options that a metal building has to offer. In many cases, choosing a PEMB construction option can improve your project by quickly and cost-effectively delivering a high-performing custom designed turnkey building solution. They can be adapted to your design and floor plan needs. They are cost effective and save on construction time.

Butler buildings come with the state-of-the-art MR-24 roof system. This is a premier roof that is sealed with 2,000 pounds of pressure, basically creating a solid sheet of steel over your building. This roof will provide you with peace of mind for generations to come. CCC became an authorized Butler Builder in 1997, and achieved prestigious Career Builder status in 2001. As a Butler Career Builder, CCC is uniquely positioned to offer you access to the highest-quality PEMB systems in the industry.

Metal buildings offer the size and design flexibility that makes them perfect for indoor sports facilities.

CCC's 3D BIM Virtual Modeling lets you see just how flexible PEMBs can be. Your facility can be fully customized to reflect your design vision and the needs of your business.

Roofs fail. When that happens, CCC can install a Butler MR-24® Re-Roof.

SEEING IS BELIEVING
